

Oaks Newsletter 10.10.25

Oaks have continued to work hard in all areas of the curriculum during the last two weeks. They have been enthusiastic to find out answers to questions that have come up during learning as well as discussing differences of opinions in a very thoughtful manner.

Science has proven to be enjoyed by all especially when investigating the theory of light, reflection and shadows. We were also fascinated to discover more about how we see and how light enters the eye.

In R.E we have been thinking about spreading good news. We began by thinking about the different ways good news could be spread, what good news we have shared and how. We are now beginning to think about why the gospel is such good news for Christians.

The lovely weather has enabled us to have some great P.E lessons. We have enjoyed developing our skills in rugby and netball.

History has been very exciting and especially with our visit to Bovington Tank Museum this week. The day was very busy, and we couldn't believe how quick the day went. We took part in two guided activities and were able to explore the museum. Many of us particularly enjoyed the challenge of making a Sherman Tank out of tin foil and seeing how many marbles it would hold and float before sinking. It was also a privilege to try on costumes as well as re-enacting times from the First and Second World Wars. A highlight of the day was trying on a gas mask, squeezing into an air raid shelter and experiencing what it was like in the trenches of the First World War. Much learning took place, and the children have come away with many more questions to explore and investigate.

Below are a few photographs from the day.

Belinda Bolar, Sarah Salisbury and Millie the Dog.
